Crumbs and Giggles

Canadians buy MILLIONS of cookies every year, and yet most delivery apps treat them like an afterthought.
Crumbs & Giggles asks a simple question:
What if cookies were finally given the spotlight they deserve?

Insight

- Cookie market is growing in Canada and global.
- Users crave personalized visually appealing, TikTok-style desserts.
- Transparency is a major trust builder (allergens, sugar, ingredients.
- Users want fast, guilt-free indulgence that fits lifestyle & budget.
- Local bakeries struggle with digital reach and clarity in menus

Cookies account for a significant

9.7%

of the overall Canadian dessert market, Gen Z being biggest consumer

A raise in revenue for cookie market is to increase

US$4.72 billion

in 2025

Nearly

72%

Of Canadians eat cookies making nation's most popular sweet baked good

Global cookie market is projected to reach

US$54.9 billion

by 2030

About

Navigating online cookie options can be overwhelming, with unclear ingredients and inconsistent quality creating frustration for many shoppers. This project aims to simplify this experience by designing a cookie-ordering app that's fun, safe, and tailored to each user's needs.

Problem Statement 01

HOW MIGHT WE

design a one-stop shop that brings together quick, high-quality,and tasty cookie options to satisfy families and individuals especially those with picky eater kids given the current lack of such an option?

Target Audience 02

Primary User:

- Families/parents (allergen safety and convenience)
- Kids (simple choices, fun flavors).
- Busy, trendy students & young adults.

Secondary Users:

- Socially influenced (TikTok/IG), budget-aware, want novelty and clarity.
- Local bakeries (visibility and streamlined ordering).

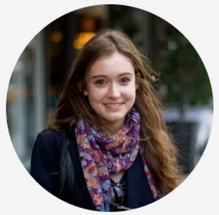
Proposed Solution 03

To create a delightful, transparent, and personalized cookie, ordering app that blends playful branding with responsible data use, allergen safety, and an accessible, human-centred design.

Who Is Emma?

Navigating online cookie options can be overwhelming, with unclear ingredients and inconsistent quality creating frustration for many shoppers. This project aims to simplify this experience by designing a cookie-ordering app that's fun, safe, and tailored to each user's needs.

User Persona



Emma Carter

About

- 22 Years
- Toronto, ON
- Single
- Female
- Bachelors of Psychology

Bio

Emily is a busy undergrad balancing school and a part-time café job. She enjoys cookies 2–3 times a week as quick snacks or study treats. While budget-conscious, she splurges on fun flavours like matcha or stuffed cookies and loves posting them on Instagram/TikTok. Health matters to her so she works out and seeks reduced-sugar options but she still indulges when stressed. Her main pain points are guilt over sugar, high prices, and limited healthier yet tasty cookie options nearby.

Motivations

- Convenience: quick snack between classes
- Indulgence: stress-week treat
- Social Sharing: Insta/TikTok-worthy cookies
- Exploration: tries unique & limited flavors

Goals

- Balance health and indulgence in her snacking habits
- Find affordable cookies that still feel like a treat
- Discover new, fun flavors that stand out from the ordinary
- Support local cafés or bakeries when possible

Frustrations

- Feels guilty about high sugar content in cookies and worried to find healthy options.
- Premium cookies often feel too expensive on a student budget.
- Disappointment when cookies don't look "Instagrammable".

Personality

Introvert

Thinking

Judging

Assertive

Intuitive

Technology

Social Networks

Online Shopping

Brands

EMPATHY MAP [Emma Carter]

Thinks & feels

- Cookies are her comfort food, but she worries about sugar intake.
- Price and flavor are top priorities, though she'll pay extra for unique.
- Feels excited when she sees trendy options.
- Feels nostalgic when eating classic cookies that remind her of home.

See

- Cookies and snacks displayed at cafés, grocery stores, and local bakeries.
- Social media posts of trendy desserts and unique cookie flavors.
- Roommates and friends snacking casually during study sessions.

Pains

- Guilt from high sugar content.
- Premium cookies often cost more than her student budget allows.
- Few tasty yet healthier cookie options nearby.

Hears

- "Let's grab something sweet after class."
- "This cookie spot went viral on TikTok."
- "Too much sugar isn't good for you."

Says & does

- "I just need a quick snack between classes."
- "I want cookies that taste amazing but aren't loaded with sugar."
- "If it looks good, I'll definitely post it on Instagram."
- Buys cookies 2–3 times a week, often to go.
- Scrolls TikTok/Instagram for dessert trends.

Gains

- Affordable indulgences that balance taste and health.
- Instagram-worthy treats to share online.
- Unique flavors and fun experiences tied to cookies.

	Awareness	Onboarding	Exploration	AI Personalized Search	Feedback & Rewards	Retention & Sharing
User Actions (Activities)	Sees ad or post showcasing your fresh, handmade cookies and family-friendly variety. Downloads the app.	Completes the "What do you crave?„ quiz about flavor, texture, and dietary preferences.	Browses personalized home feed with categories like "Soft & Gooey„, "Festive Specials„, and "Best for Kids.„	Uses smart quiz and filter recommendations (e.g., "Nut-free for kids„, "Soft center„, "Holiday favorites„).	Leaves a review, earns "Cookie Points„, and gets personalized recommendations for next order.	Shares favorite cookies or gift boxes with friends and family.
Goals / Experience (Interaction Points)	Find a trustworthy, easy way to order cookies directly from the baker.	Feel personally understood and excited to explore the cookie range.	Easily explore cookies that match specific moods or occasions.	Save time and feel confident they'll love what they order.	Feel valued and part of the brand community.	Feel joy in gifting and being part of something warm and familiar.
Pain Points (Thought Bubbles)	Too many generic dessert options online, unsure about freshness or quality.	Typical apps feel repetitive or impersonal during onboarding.	Overwhelmed by too many flavors without clear guidance.	Manual searching on bakery sites feels slow and inconsistent.	No sense of recognition after purchase.	Forgets to check app between holidays or events.
Emotions (Mood Meter)						
Possible Solutions (Opportunities to improve the experience)	Highlight freshness, brand story, and behind-the-scenes baking visuals to build instant trust.	Make onboarding playful and flavor-driven, with quick results that show top cookie matches.	Use visually rich categories, allergen icons, and occasion-based sorting to simplify browsing.	AI learns preferences over time and refines suggestions for faster, more accurate choices.	Reward engagement through discounts, early access to new flavors, or loyalty badges.	Send seasonal reminders, new flavor launches, and bundle deals to encourage return visits.

Journey Map

Core Features (Must-Haves):

- Personalized home screen.
- Flavor quiz.
- Smart filters (allergens, texture, sweetness level.
- Detailed cookie cards.
- Bakery profiles with transparent ingredient info.
- Wishlist, reviews, quick ordering.

Why These Features?

Directly address decision fatigue, safety concerns, and the need for personalized discovery.

Testing

To ensure Crumbs & Giggles was desirable, intuitive, and grounded in real user needs, we conducted a structured concept testing throughout the project. Here's how the idea was validated and refined.

When We Test?

Testing happened at key checkpoints such as ater feature ideation, before prototyping, before major pivots, and throughout iterative cycles to ensure every decision was backed by real user feedback.

What To Test?

We evaluated which features users found most essential, how clearly the value proposition came across, visual preferences (branding, layout, aesthetics), and the clarity and efficiency of core user flows.

How We Tested?

We used multiple methods:

- Concept Testing to validate the overall idea.
- Feature Ranking to identify top-priority features.
- Comparison Testing against existing dessert and delivery apps.
- Scenario-Based Testing to observe real-world navigation and decision-making

Outcome:
This process ensured the prototype became intuitive, engaging, and aligned with genuine user needs strengthening the final solution.

Rationale

This section outlines how Crumbs & Giggles evolves from concept to a validated, user-centered solution. Through iterative testing, clear success metrics, and a long-term strategic plan, the platform grows stronger, more refined, and aligned with real family and bakery needs.

Iteration Plan

Iterative Process:

- Continuous improvement through user testing at every stage
- Identify pain points → prioritize by impact & feasibility
- Refine UI/UX → re-test to confirm improvements
- Document insights and next steps after each cycle

Success Metrics:

- Weekly/monthly orders
- User retention + 4.5+ average app rating
- Bakery onboarding rates
- Social media engagement and community growth

Long-Term Strategy:

- Launch full web platform
- Introduce cookie-ordering
- kiosks in malls & campuses
- Expand AI for deeper personalizatio
- Offer monthly subscription treat boxes to build long-term loyalty

Why Us?

- Hyper-personalized cookie recommendations based on flavor profile, dietary needs, and lifestyle.
- Clear allergen transparency builds trust, especially for families and sensitive users.
- Highlights local bakeries, supporting small businesses and offering fresh, handcrafted options.
- Warm, family-friendly interface creates an inclusive and emotionally engaging experience.
- Delivers a curated, safe, and delightful journey that standard delivery apps can't match.

Refined Problem Statement

For mothers with picky-eater kids, Crumbs & Giggles is a personalized cookie marketplace that makes finding quick, tasty, and safe treats effortless. Unlike generic dessert platforms, we tailor every recommendation to your family's tastes, dietary needs, and safety requirements.

ECI Check:

Ethical:
- Prioritizes transparency and user trust.
- Clear ingredients & allergen info.
- No dark patterns in navigation or upselling.
- GDPR & PIPEDA compliant.
- Explainable AI recommendations.

Cultural:
- Inclusive flavors for diverse celebrations (Eid, Diwali, Lunar New Year, Christmas).
- Multilingual support.
- Accessible UI for all abilities.

Industrial:
- Supports small bakeries with digital tools and kiosk integration.
- Aligns with trends: plant-based, allergen friendly, dessert-focused delivery.
- Enhances bakery visibility and customer reach.

Month	Focus Area	Deliverables
December – January	UX Flows & Low-Fidelity Wireframing	User flows, site map, wireframes
February	UI Design System & High-Fidelity Screens	Color system, typography, components, final UI set
March	High-Fidelity Interactive Prototype	Fully interactive Figma prototype
April (Early)	Usability Testing & Iteration	Testing report, refinements to prototype
April (End)	Final Execution & Submission	Final prototype, full documentation, capstone presentation

EST. 2025

Next Steps:

Short Term:

- Finalize high-fidelity prototype
- Conduct usability testing
- Optimize allergen filters + bakery onboarding flow

Long Term Vision:

- Web platform
- Campus kiosk rollout
- Subscription boxes
- Deeper AI flavor predictions
- Seasonal/holiday collections
